Details of the company commissioning the service / stand Contractor

Declaration for waste code 17 09 04

As it is not possible for me to collect the waste under the code "17 09 04" myself (mixed waste from construction, renovation and dismantling), including stand construction elements and bulky waste, I order Targi w Krakowie Sp. z o. o. to dispose of the above waste.

I agree to the fee referred to in the "Technical, Fire Safety and Security Regulations for Building Contractors in force on the EXPO Krakow premises" Article 7. Rules of order, section 7.9. at the same time agreeing to pay it within 7 days of the invoice date.

The fee is charged per cubic metre of waste left behind and amounts to PLN 1450.00 net/m³.

Waste left on the stand must be:

- 1) placed evenly on a pallet or wooden support with a minimum height of 8cm,
- 2) protected (foiled / bundled) and prepared for transport by forklift / pallet truck,
- 3) signed / contain a label with the Contractor's name and stand number.

Measurement of waste prepared for transport and disposal takes place after the stand dismantling has been completed **in the presence of an authorised representative of the stand Contractor and a representative of Targi w Krakowie Sp. z o.o.** Measurement is taken by measuring the outermost, outer points of the stacked waste.

EXAMPLE: Prepared pallet of waste with dimensions:
1.5 m (length) x 1.5 m (width) x 1.3 m (height) = 2.925 m³
2,925 m³ x PLN 1450 net = PLN 4241.25 net.
